PROFILE

Software Engineer who enjoys building and improving backend systems with .NET. My experience spans business applications, backend architecture, relational databases, external integrations, and deployment automation. I enjoy understanding complex systems and building software that remains reliable and easy to maintain as it evolves.

EXPERIENCE

Cyrus Technology Egypt

Nov 2025 – Present

Software Engineer

Cairo, Egypt

- Build and improve backend services for a **multi-tenant POS platform** covering sales, inventory, invoicing, reporting, and customer management.
- Develop integrations with external services, including **ETA** and **Fawry**, improving reliability through **Hangfire** background processing, retry strategies, and caching.
- Contribute to platform architecture, including **multi-tenancy**, database migration workflows, and offline synchronization.
- Build internal tools and services supporting operational workflows, secure document processing, and platform operations.
- Automate deployment workflows and maintain **Linux-based** environments using **GitHub Actions**, **Docker**, and Nginx.
- Investigate production issues, optimize database performance under concurrent loads, and collaborate on technical design and code reviews.

Freelance Backend Developer

Jul 2024 – Feb 2025

Software Engineer (Self-Employed)

Remote

- Delivered custom backend applications and **REST APIs** for client projects.
- Worked directly with clients to understand requirements and translate business needs into practical software solutions.
- Designed application architecture, **database structures**, and backend workflows.
- Managed the complete **project lifecycle** from planning and development to deployment and client delivery.

TRAINING & INTERNSHIPS

Route Academy

Jul 2023 – Oct 2023

Software Engineer Intern

- Built and maintained backend **APIs** using **Node.js**, **Express.js**, and **MongoDB**.
- Implemented secure user signup and login processes, including token-based authentication (**JWT**) and media upload services.
- Worked with Git, Postman, and **Docker** in a collaborative development environment.

Orange Digital Center Egypt

Sep 2022 – Oct 2022

Software Engineer Intern

- Completed an intensive backend training program covering **PHP**, **MySQL**, and web app development.
- Built a Doctor Appointment Booking System as the final training project.
- Gained practical experience designing relational databases and developing backend applications.

TECHNICAL SKILLS

Languages: C#, SQL, JavaScript

Backend: ASP.NET Core, Entity Framework Core, RESTful APIs, Node.js, Express.js

Architecture: Clean Architecture, CQRS, Multi-Tenancy, SOLID Principles, Design Patterns

Databases: SQL Server, MySQL, SQLite, MongoDB

DevOps & Infrastructure: Docker, GitHub Actions, Linux, Nginx

Testing: xUnit, Moq, FluentAssertions

Tools: Git, GitHub, Postman, Jira

Cloud: Microsoft Azure (AZ-900)

PROJECTS

Goodreads Clone API | *ASP.NET Core, Clean Architecture, CQRS*

[GitHub](#)

- Built a RESTful API for a Goodreads-inspired platform using **ASP.NET Core** and **Clean Architecture**.
- Structured the application using **CQRS** (MediatR), integrated **Azure Blob Storage**, and offloaded recurring tasks to **Hangfire** background jobs.

BulkyBook | E-Commerce | *ASP.NET MVC, EF Core, SQL Server*

[GitHub](#)

- Built a full-stack bookstore web application using **ASP.NET MVC** and **Entity Framework Core**.
- Integrated **Stripe** API for payment workflows and role-based authorization.

SarahaApp – Messaging API | *Node.js, Express.js, MongoDB*

[GitHub](#)

- Built an anonymous messaging API using **Node.js**, **Express.js**, and **MongoDB**.
- Implemented token-based authentication (**JWT**) and secure media upload pipelines.

Image Faker – Dynamic Placeholder | *Node.js, Express.js, Canvas*

[GitHub](#)

- Created a utility API using **Node.js** and **Canvas** to generate dynamic placeholder images for testing.
- Containerized the application using **Docker** for portable deployments.

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900)

Issued Jul 2026

Back-End Diploma (Node.js) – Route Academy

[Certificate](#)

Responsive Web Design with HTML and CSS – Udemy

[Certificate](#)

Foundational C# with Microsoft – freeCodeCamp

[Certificate](#)

SQL (Intermediate) – HackerRank

[Certificate](#)

EDUCATION

Bachelor's Degree in Computer Science

Sep 2020 – Jun 2024

Higher Technological Institute

Egypt

- **GPA: 3.97/4.0** with honors
