PROFILE

Software Engineer with proven backend expertise in **.NET Core** and **C#**, delivering **secure, scalable Web APIs** with **Clean Architecture** and **optimized database design**. Driven to write **maintainable, testable code** that powers **real-world applications** and accelerates product success.

EDUCATION

Bachelor's Degree in Computer Science

Sep 2020 – Jun 2024

Higher Technological Institute, 10th Of Ramadan, Egypt

- **GPA: 3.97/4.0** with honors
- Relevant Coursework: **Software Engineering, Databases, OOP, Data Structures, Algorithms, Networks**

EXPERIENCE

Freelance Backend Developer

Jul 2024 – Jan 2025

Remote

- Designed and built **secure APIs, authentication systems, and dashboards**.
- Communicated directly with **clients** to gather requirements and deliver **production-ready features**.
- Improved usability and fixed **real-world bugs** based on user feedback.
- Handled the **full project lifecycle** from planning to delivery under **tight deadlines**.

INTERNSHIPS

Route Academy

Jul 2023 – Oct 2023

Backend Engineer Intern

- Built and maintained **scalable backend APIs** using **Node.js, Express.js, and MongoDB**.
- Implemented **user authentication, file uploads, and email services**.
- Worked with **Git, Postman, and Docker** in a **collaborative environment**.

Orange Digital Center

Sep 2022 – Oct 2022

Trainee

- Gained practical experience with **PHP, phpMyAdmin, and MySQL**.
- Built a **Doctor Appointment Booking System**. [GitHub](#)

TECHNICAL SKILLS

- | | | | |
|-------------------------|----------------|----------------------|------------------------|
| • C# | • Node.js | • RESTful APIs | • Unit Testing (xUnit) |
| • ASP.NET Core | • JavaScript | • JWT Auth | • HTML / CSS |
| • Web API | • MongoDB | • SOLID Principles | • Algorithms |
| • Entity Framework Core | • Docker | • Design Patterns | • Data Structures |
| • SQL Server | • Git / GitHub | • Clean Architecture | |

PROJECTS

Goodreads Clone API | *ASP.NET Core, Clean Architecture, CQRS*

[GitHub](#)

- Developed **modular RESTful API** for **books, authors, reviews**, and **user shelves**.
- Implemented **Clean Architecture** with **CQRS** for scalability and testability.
- Integrated **JWT authentication**, **Azure Blob Storage**, and **Hangfire** for background jobs.
- Added **Swagger**, **health checks**, and full **user management system**.

E-commerce Platform | *ASP.NET Core MVC, EF Core, SQL Server*

[GitHub](#)

- Built **book store web app** with **Stripe payment integration** and **role-based authorization**.
- Implemented **shopping cart** and **order tracking** modules.

SarahaApp – Messaging API | *Node.js, Express.js, MongoDB*

[GitHub](#)

- Built **anonymous messaging API** with **email verification**, **image uploads**, and **JWT-based authentication**.
- Implemented **email notifications** and **QR generation**.

Image Faker – Dynamic Placeholder | *Node.js, Express.js, Canvas*

[GitHub](#)

- Developed **API for generating dynamic placeholder images** with custom text and styles.
- Containerized and deployed using **Docker** and **Render**.

CERTIFICATIONS

Back-End Diploma (Node.js) – Route Academy

[Certificate](#)

Responsive Web Design with HTML and CSS – Udemy

[Certificate](#)

Foundational C# with Microsoft – freeCodeCamp

[Certificate](#)

SQL (Intermediate) – HackerRank

[Certificate](#)

EXTRACURRICULAR ACTIVITIES

- **Volunteer – Life Makers Foundation**
Created and managed media content, participated in donation drives, and conducted case studies.
- **CS Committee Member – IEEE HTI Student Branch**
Participated in technical events and workshops.
